67 & 69, Whitehall Street.

The figure is a line graph titled "Relationship between the number of days since the start of the outbreak and the number of cases per day". The horizontal axis (x-axis) is labeled "Number of days since the start of the outbreak" and ranges from 0 to 100 with major tick marks every 20 units. The vertical axis (y-axis) is labeled "Number of cases per day" and ranges from 0 to 10 with major tick marks every 2 units. The data points are connected by a solid black line. The curve starts near zero at day 0, remains low until about day 10, then rises steeply to a peak of approximately 9 cases per day around day 22. After the peak, the number of cases decreases steadily, reaching about 4 cases per day by day 40, 2 cases per day by day 60, and continuing to decline slowly towards day 80.

**USE THE GENUINE WATERS!**  
**VICHY CELESTINS, WILDUNGER HELENE, FACHINGER.**
